

# Trail Intersection Marking Project at Horn Pond

## Phase 2 map

This Phase 2 map represents a collaborative effort between the Woburn Residents' Environmental Network (WREN) and the Woburn Conservation Commission to improve the marking and mapping of trails at Horn Pond.

- Numbered intersections (posts). Wooden posts\* are placed at major trail intersections, which correspond to numbered positions on this map. (\*Except 24-26: see note on map.)
- Additional posts. Along the two Memorial Trails, several additional posts are placed to help guide your path. These have no numbers, but are marked with either red or orange bands (or both), along with directional arrows.
- New map forthcoming. A more formal new map and guide for the entire area will later be created, which will mark the completion of this project. Information about this, when ready, will appear at the website below. This part will take some time to complete.
- Get this map. Visit [www.GoWREN.org](http://www.GoWREN.org) to download a copy.
